Monitoring of CO₂-emissions from passenger cars

- EU-guidelines for manufacturers:
 - 2015, average CO₂-emissions: 130 g/km
 - 2020, average CO₂-emissions: 95 g/km
- Target-value rises with vehicle mass
- Excess emission premium: €95 per sold vehicle and gram of CO₂ above target value

Twin strategies for emission-reduction: Technology improvement and changes to demand

Best selling brands in europe 2010

The state of the market and the challenges faced

- What's the situation on the Swedish market?
- Sales of new cars for 2010
- What can the dealerships do to reduce the CO₂-impact of sold vehicles?

What can dealerships do?

- The effects of a shift to greener models in sales?
- The most fuel-efficient variant sold for every model
- Otherwise unchanged distribution among the selected brands
